

1. **Print this page and read it before you download any housing applications.** In the table below, see where you fit in terms of household size and income. This will tell you if you are a 30% AMI applicant, or a 40% AMI applicant, or higher. At the bottom of the table you can then see what type of housing you should apply to: **Subsidized Housing**, **Affordable Housing**, or **Market / Income Restricted Housing**.
2. Close this page will bring you back to the **Housing Search Results** page. Locate the drop-down filter labelled: **LIMIT TO** → and select **Subsidized**, **Affordable**, or **Market or Income Restricted** as your preferred housing type (ignore the other options).
3. Next: click the **Apply** button. *This will change the list of results so that it only gives you applications for housing programs you can afford.* Note: Applicants whose income is near the border between two categories should feel free to apply to both categories.
4. We list 50 waitlist results on each page, so you may see multiple pages. Also, there are other ways to filter or sort the results: for instance, you can narrow the list to housing in one particular zip code; or you can bring all the waitlists that are newly opened to the top of the page.

#### Advice for Everyone:

- Applications can take a long time to complete. But if you will type all your answers on the first two pages before printing, this will often complete many other pages, saving you time.
- If you ever want to change your search, scroll to the bottom of this page, and click "Modify or refresh your search"

#### Advice for Anonymous Users:

- There is an easy way to keep a record of where you have applied! Simply print these search results pages, and, as you download and print out housing applications, find that waitlist on the printed copy you made, and write down the date you applied. That way, when you come back next week, you won't waste time printing an application you have already submitted.

HH Size	30% AMI	40% AMI	50% AMI	60% AMI	65% AMI	70% AMI	75% AMI	80% AMI	90% AMI	100% AMI
